~ BUSINESS ANALYTICS ~

CA, US | +1(341) 221-8532 | khush.domadiya05@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Summary

Business Analyst with 4+ years of experience supporting healthcare, manufacturing, and financial services initiatives, with a current focus on healthcare claims, population health, and operational analytics. Experienced in requirements elicitation, process mapping, user stories, functional documentation, UAT, defect management, and Agile delivery. Skilled in using SQL, Power BI, reporting automation, and AI-assisted analysis to validate data, improve workflows, and translate business needs into practical system and process improvements. Effective at partnering with clinical, operations, product, engineering, and technology stakeholders in compliance-driven environments.

Professional Experience

Business Analytics Analyst

Molina Healthcare – US | September 2025 – Present

- Analyze healthcare claims, pharmacy, EHR/EMR, and operational data to identify utilization trends, cost drivers, and opportunities to improve provider and population health performance.
- Partner with clinical, operations, and business stakeholders to gather reporting requirements, define KPIs, and translate business needs into Power BI dashboards and automated reports.
- Validate and reconcile data from Epic, Cerner, and enterprise data repositories, resolving discrepancies and standardizing reporting workflows to improve data consistency and usability.
- Automate recurring SQL queries and Power BI refresh schedules, reducing report preparation time by 35% across recurring analytics and reporting processes.
- Support HIPAA-compliant reporting by investigating data-quality issues and delivering actionable insights that help stakeholders evaluate utilization, provider performance, and cost-containment initiatives.

Web Development Business Analyst Intern

American Chemical Society – US | May 2025 – August 2025

- Owned requirements-to-delivery for the New Member Onboarding / Wayfinding MVP by translating stakeholder needs into epics, user stories, acceptance criteria, and a prioritized Jira/Confluence backlog; aligned scope and release goals.
- Facilitated Agile execution (refinement, sprint planning, standups, reviews, retros) and supported delivery tracking (milestones, dependencies, burndown/velocity) with concise weekly status updates and decision logs.
- Coordinated QA/UAT by creating test cases mapped to acceptance criteria and Figma designs; validated across dev/stage/prod, managed defect triage, and partnered with engineers to drive fixes to closure.

Business System Analyst

Pfizer – India | Aug. 2023 - Jul. 2024

- Partnered with manufacturing, operations, and engineering stakeholders to gather and analyze business requirements for a digital manufacturing analytics and workflow automation platform, identifying opportunities to streamline production and reporting processes.
- Translated business and operational needs into functional specifications, process flows, data mappings, and data models, enabling technical teams to deliver enhancements across manufacturing execution, OSI-PI, and SCADA systems.
- Developed Power BI dashboards and automated reports that provided near-real-time visibility into equipment performance, production workflows, and operational KPIs for manufacturing and operations teams.
- Automated equipment-data integration and recurring reporting workflows, reducing manual effort by 35% while improving the accuracy and consistency of operational analytics.
- Coordinated UAT by preparing test scenarios, validating system enhancements, documenting defects, and working with technical teams to confirm that solutions met business, operational, and compliance requirements.

- Used SQL, root-cause analysis, and AI-enabled analytics to investigate application and data issues, validate corrective actions, and improve deployment quality by 20% while expanding access to manufacturing data.

Business Analyst

Capgemini | Aug. 2021 – Jul. 2023

- Partnered with business stakeholders, developers, and QA teams to gather and analyze requirements for a digital customer onboarding and loan origination platform supporting credit evaluation and loan-processing workflows.
- Translated business needs into user stories, functional specifications, acceptance criteria, and process flows, helping Agile delivery teams maintain alignment between business objectives and technical solutions.
- Performed SQL-based data validation, data reconciliation, ad hoc analysis, and business reporting to verify customer onboarding, credit evaluation, and loan origination data across application workflows.
- Improved requirement quality and documentation standards by 30% by introducing detailed process mapping, maintaining an organized product backlog, and managing requirements through Jira, Confluence, and Azure DevOps.
- Coordinated UAT planning, test execution, defect tracking, and production release support, contributing to a 25% reduction in post-deployment issues.
- Supported cloud-based system integrations and continuous process improvement initiatives that streamlined loan-processing workflows and improved the digital onboarding experience.

Technical Skills

Business Analysis: Business Requirements Gathering, Business Process Analysis, Functional Specifications, User Stories, Gap Analysis, Process Mapping (BPMN), Workflow Analysis, Business Process Improvement, Requirements Traceability Matrix (RTM), Stakeholder Management, Change Management, Root Cause Analysis, BRD and FRD Documentation

Data Analytics & Business Intelligence: Business Analytics, Data Analysis, SQL, Power BI, Advanced Excel, KPI and Interactive Dashboards, Executive Reporting, Ad Hoc Reporting, Reporting Automation, Data Visualization, Data Validation, Data Quality Analysis, Operational Analytics, Performance Metrics

Data Management: Data Modeling, Data Integration, ETL Concepts, Data Mapping, Master Data Management, Data Governance, Data Cleansing, Data Reconciliation

Agile, SDLC & Testing: Agile (Scrum), SDLC, Sprint Planning, Backlog Refinement, UAT Coordination, Test Case Review, Defect Tracking, Release Management

Tools & Platforms: Jira, Confluence, Azure DevOps, Azure, AWS, OSI-PI, SCADA, Ignition, Kepware

AI & Automation: Generative AI, Large Language Models (LLMs), AI-Assisted Business Analysis, Workflow Automation, Prompt Engineering

Domain Knowledge: Healthcare Analytics, Claims Analytics, Population Health Analytics, Manufacturing Analytics, Manufacturing Execution Systems (MES), Equipment Data Integration, Digital Manufacturing, Customer Onboarding, Loan Origination, Banking and Financial Services (BFSI)

Education

M.S. in Business Analytics – California State University, Eastbay Hayward, CA

B.Tech. in Information Technology – Gandhinagar Institute of Technology, Gandhinagar, India

Certifications

Certification of Capability in Business Analysis (CCBA)

Certified Analytics Professional (CAP)

IBM AI Product Management Certificate

Certified associate in project management (CAPM)
