

Khush Domadiya

San Jose, California (Open to Relocate) | +1 (341) 221-8532 | domadiyakhush05@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Summary

Business Analyst with hands-on experience gathering requirements, documenting user stories with acceptance criteria, and facilitating Agile ceremonies across development lifecycles. Skilled in SQL for data validation, Excel for analysis, Tableau and Power BI for stakeholder dashboards, Jira and Confluence for backlog management. Proven ability to translate business needs into actionable specifications and deliver insights that drive process improvements.

Certification: Certified Associate in Project Management ([CAPM](#)) | IBM AI Product Management [Certificate](#)

Professional Experience

Student Business Analyst

Sep 2024 - Present

California State University, East Bay - Hayward, California

- Analyzed student registration data using Excel to identify trends in attendance and preferences, developed event plans that boosted participation by 35%, supporting campus engagement goals and resource allocation.
- Collected and processed student feedback surveys post-events, generated reports highlighting key themes to refine strategies and improve satisfaction scores for stakeholders.
- Created dashboards and visualizations to track registration metrics and feedback KPIs, collaborated with stakeholders to prioritize data-backed initiatives for campus events.

Web Development Business Analyst Intern

May 2025 – August 2025

American Chemical Society - Washington D.C. USA

- Led requirements elicitation through stakeholder interviews and workshops, translating business needs into epics and user stories with clear acceptance criteria for New Member Onboarding MVP.
- Facilitated Agile sprint ceremonies including planning, refinement, daily standups, reviews, and retrospectives, tracked velocity and burndown metrics in Jira under tight timelines.
- Authored test cases mapped to Figma designs and acceptance criteria, performed UAT across dev, stage, and production environments, coordinated defect resolution for quality releases.

Python Analyst

January 2024 – June 2024

Axisray - India

- Automated Python ETL pipelines to clean, aggregate, and publish KPI datasets, reducing processing time by 20% and improving sentiment analysis accuracy by 18% through feature engineering and data validation.
- Produced stakeholder-ready dashboards and visualizations in Python, standardized metric definitions across product and support teams, delivered recurring analytical insights used in roadmap prioritization and operational reviews.
- Wrote technical documentation and executive summaries enabling non-technical stakeholders to interpret analytical outputs and apply findings during business reviews.

Projects [\[More Projects\]](#)

PMO Delivery Health Dashboard – Program Performance Reporting [\[GitHub\]](#)

- Built executive-ready PMO portfolio dashboard tracking project RAG status, milestone delivery, sprint plan vs completed trends, defect monitoring, and RAID log aging.
- Designed interactive filters and drill-downs by team, program, and project to support stakeholder communication, escalation, and process improvement decisions.

Taiwan Credit Card Default Analytics (Python, Pandas, scikit-learn) [\[GitHub\]](#)

- Performed requirements analysis and EDA to identify key drivers of credit default, built and evaluated classification models using logistic regression and decision trees, summarized findings and business recommendations for risk management stakeholders.

Big Data Weather Analysis – Database Optimization & Reporting [\[GitHub\]](#)

- Processed NCDC temperature records using MapReduce to extract yearly min/max/avg temperatures, published structured Hive tables for BI consumption, documented ETL flow, quality filters, and schema definitions ensuring data integrity and reproducibility.

Supply and Location Optimization (Python, Gurobi) [\[GitHub\]](#)

- Formulated mixed-integer programming model to minimize freight costs and maximize facility margins under service-level and capacity constraints, conducted sensitivity analysis recommending resource allocation strategies for supply chain stakeholders.

Skills

Business Analysis: Requirements gathering, user stories, acceptance criteria, gap analysis, process modeling (BPMN), stakeholder management, UAT coordination, use case documentation

Data & Analytics: SQL (joins, aggregations, queries), Excel (pivot tables, VLOOKUP, data validation), Power BI, Tableau, Python

Agile & Tools: Jira, Confluence, backlog refinement, sprint planning, story pointing, burndown tracking, SDLC, user story mapping

Technical Skills: Data validation, ETL workflows, KPI definitions, dashboard design, requirements traceability, BRD/FRD documentation

Education

California State University East Bay, Hayward, CA

August 2024 – May 2026

Master of Science in Business Analytics – GPA:3.8/4
